Ike's Juggling 'Hid' the 9th

WITH THE NINTH ARMY, Nov. 16 (UP)—The U.S. Ninth Army, commanded by Lt. Gen. William Hood Simpson, attacked at 12.45 PM today, ending the mystery of where it had got to.

The Germans went on several "fishing expeditions" for information about the Ninth, but, incredible as it may appear, the presence of a whole army at the front line remained a secret. It had been operational in this war theater since

Although the Ninth had never before been committed in a major attack, its units—many, if not all—are seasoned ones. The way in which Gen. Eisenhower shuffled them probably contributed to the defeat of the German intelligence. There

defeat of the German intelligence. There are actually units in the Ninth which have been shifted from one army to another four times since D-Day.

The Ninth arrived in England soon after D-Day. It was originally the Eighth Army, but Gen. Eisenhower changed its number so that it should not be confused with the famous British Eighth Army.

It was originally planned to keep the Ninth in England till October, but the speed of the Allied advance after the Normandy breakthrough speeded up the time-table. The Ninth took over the Brittany operation and the siege of Brest from Sept. 5.

After taking Brest the Ninth moved into Luxemburg for a time-before taking up its present position. It is now between the British Second and U.S. First Armies.

Entire West Front Aflame After Giant Blow by Bombers

Rumblings of the long-expected "big push" to crush Germany shook the Western Front yesterday as both the U.S. First and Ninth Armies opened strong offensives in Germany and Holland, going over to the

attack in the wake of a 1,200-heavy-bomber assault.

Six great forces, four of them American, are now hammering the Germans on the Reich's frontier regions—the U.S. Third, under Lt. Gen. George S. Patton; the Seventh, under Lt. Gen. Alexander M. Patch; the British Second Army, under Gen. Miles Dempsey; the French First Army, which, serving under Patch, also began an offensive yesterday, and the First and Ninth. These armies were striking all along the front from Holland to the Vosges Mountains in southern France.

The Ninth Army, under command of "Texas Bill" Simpson-Lt. Gen. William H. Simpson-broke out of the two-month mystery surrounding its whereabouts by thundering into action in Holland. Front-line dispatches revealed that the Ninth, which had moved into Luxemburg after cleaning up Brest, was between the First Army and the British Second in Holland, in the Dutch panhandle above Aachen.

1,200 Heavies Aid Doughboys

More than 1,200 U.S. heavy bombers went all-out in the support of American ground attacks north of Aachen yesterday.

And also during the day over 1,150 RAF heavies, escorted by upward of 250 fighters, pounded three towns east and

northeast of Aachen.

The heavily-fortified towns of Duren,
Julich, and Heinsberg, east and northeast of Aachen, were pounded by the RAF heavies,

Over 450 P47s and P51s escorted the American Fortresses and Liberators. At a late hour last night losses had not been

announced.
Yesterday's blow was the Eighth's second large-scale tactical assault in a week, comparable to the crushing bombardment which preceded the Normandy breakthrough at St. Lo and Caen, as well as the Metz offensive of Sept. 9.
Many thousands of 260-pound fragmentation bombs were spread over an area north of Eschweiler and south of the village of Langerwehe, west of Duren. German defense included flak and barrages from field-gun batteries, as well as "anti-aircraft" fire from troops in foxholes, and from strongpoints. There was no fighter opposition.

There was no fighter opposition.

On the way home, two Mustang groups, led by Capts. Henry S. Ville, of Paradise, Calif., and Dale E. Shafer, of Dayton, Ohio, strafed rail targets in the vicinity of Frankfurt and Giessen, shooting up 20 locomotives, 92 freight cars and three tracks.

The first victim, Vergie Griffin, was found lying disemboweled in a cupboard Report Plasma Is 'Sold' Wounded a Lie-FDR

WASHINGTON, Nov. 16 (Reuter)—
President Roosevelt today nailed as "an unqualified, falsehood" the rumor that "blood plasma given so spontaneously and patriotically to the Red Cross by millions of Americans is being sold to our wounded fighting men." People who spread this story should be reported to the FBI, the President declared.

It was in this general area that both the First Army, under Lt. Gen. Courtney H. Hodges, and the Eighth Air Force Fortresses and Liberators struck, taking advantage of the first break in bad weather which had bogged operations for the last week.

Strike North of Aachen

The airmen's targets were the Germans' defensive positions on an arc between Duren and Eschweiler, northeast of Aachen. Both these towns are in the direct path of any major thrust for the important sail center of Cologne, one of the chief cities of the Rhineland, the war industrial area which may be the goal of the First and Ninth Armies.

The Ninth Army, which the Germans had frantically reported all over the Western Front in an effort to smoke out

its whereabouts, was last heard of two its whereabouts, was last heard of two months ago, when it captured Brest. Since, Simpson has moved his troops over three countries—France, Belgium and Holland—an 800-mile leapfrog operation which will be one of the best strategy yarns when it can be told.

The Ninth opened up its drive at 12:45 PM, an hour and 45 minutes after the First had thrust from its positions around the Aacheh area. Both moves were pre-

Unworthy GI Guests Nov. 13, 1944

Dear Stars and Stripes,

Why is it that after some Yanks accept hospitality in an English home, instead of showing appreciation, they make unworthy remarks about the home they visited? In comparing the lack of certain conveniences in an English home with those in the States, the GI should remember that England has had over five years of war and even if the family needed additional or newer fixtures they could not buy them, because furniture is rationed.

There is also the scarcity of "house-work." Back home a mother may have several children between the ages of 14 and 18 helping her with chores. Over here, when children reach 14, it's "off to work we go." In spite of this lack of help, the average English home is quite neat-perhaps much neater than the homes of some of those Yanks who

So, remember, you freedom-loving guys, respect the privacy of an English home just as you would want other fellows to respect your home. If some English family does something to make your stay here more enjoyable, show your appreciation. If you don't intend to, let some other more deserving Yank be the guest.—T/5 Andy F. Kisacky.

Fighter Support or DFCs? Nov. 11, 1944

Dear Stars and Stripes, That letter in regard to DFCs (in the Nov. 11 B-Bag) is a lot of tripe. At the time when the Eighth AF gave DFCs the missions were so hard that most of the boys were "damn good and dead" by the time they got their awards. Naturally as the conditions improved, the "automatic awards" of the DFC were discontinued.

I'm in the middle of a tour of missions, and I know it's no picnic, but it's fairly normal war, with chances no better or worse than the doughfeet take . . . not almost certain death as it used to be. Which would the "Browned Off Co Pilots" rather have . . . good fighter support or DFCs—if they finish?—

T/Sgr. J.K.B., Eighth AF B.G.P.

Nov. 13, 1944

Dear Stars and Stripes, In reply to the two poor, poor browned-off co-pilots' plaint in the issue of Nov. 11 there are units overseas, in combat, who've seen ten times as many days combat as you. Yet they keep going, without asking for medals and clusters for each additional objective taken or counter-attack repulsed. Also, they expect to stick to the job till it's over, without a 50 per cent bonus either.

And ask the P47 boys who've been on liaison assignments with the tanks whether or not it's rough in the AGF. Why don't these co-pilots grow up?—A Combat Officer—now in a Hosp. Plant.

Volunteer' MPs Didn't

Nov. 8, 1944 Dear Stars and Stripes,

This is being written in re of an article which appeared in your paper, under the heading, "Combat Airmen, Tours Over, Take MP Beats in London." In this article quite a few of us were surprised to see that we had "volunteered." It seems that you, or other parties, are running under a misapprehension, or that you quite possibly had been misinformed.

The truth is the majority of us were drafted with the promises, of high ranking officers, that we would have priority on shipping home after we finished our 30 days as MPs. Well, those promises were laid away on a shelf. Or should I say they were "volunteered" away. Just writing this to let you know the facts.—Beat-up beribboned gunner, T/Sgt. Robert Bennett. N a recent editorial, Life magazine expressed the fear that the American soldier may return from the war a parochial xeno-

We didn't know what parochial xenophobe meant either-so we looked it up. What it means; roughly, is a guy who hates foreign

We've been listening to a lot of Joes sound off about the British, the French, the Belgians and other folks from other lands in which this Army has trained and fought.

Some of these birds would make you think Life's fear was fact. These guys see no good in anybody and no beauty anywhere. They hate the British for being British. They hate the French for being French. They hate the Ay-rabsfor being dirty. They hate the Dutch for being clean. They just don't give a damn about anybody or anything except the good old U.S.A. "Just wait till we get back there and try and pry us loose again" just about expresses their point of view.

We don't think those guys talk the language of the average GI.

We think they talk the loudest, but we don't think they talk for the most. From the letters we get -from the things we see-from the memories we cherish-we

think most Americans aren't parochial xenophobes.

Most of us realize for the first time what a small world this is. That all of us are neighbors. That something rotten in Denmark stinks like hell in the U.S.A. Lots of us sense for the first time that our big, strong, young country is married to the rest of the world -for better or worse.

We think some of our worst parochial xenophobes will change their tune when they get back home. Twenty years from now they'll be telling their kids about the dart game in the pub at Little Piddlehinton. About the cheers and beers they garnered in Brittany and Belgium. About the little old woman who came out of the rubble at St. Lo and murmured "Nos liberateurs!"

Fresh from ETO, a Reporter Finds:

Japs Fight a Quieter War, But It's Just as Deadly

NEW YORK, Nov. 16 (ANS)-Here | dwindles into a forest track several miles are some impressions of contrasts in fighting in the Philippines and the ETO, as reported by Homer Bigart, New York Herald Tribune correspondent at Gen. MacArthur's headquarters.

Bigart reported the Britain-based air war against Germany and the Italian campaign before shifting to the Pacific. Coming from the European fronts, he has been impressed by the weakness of Japanese artillery, and their failure to employ mines with anything like the diabolical thoroughness of Field Marshal Kesselring's army in Italy.

The first Japanese Imperials have perhaps four 75s on the Ormoc Road. Their fire has been woefully ineffective except against an easy pointblank target such as the Americans presented in the first seizure of Breakneck and before they were dug in.

Can't Haul Them Out

The Japanese are said to have heavier guns at Ormoc, but have not succeeded J. C. W. in hauling them over the road, which

short of Breakneck.

Moreover, both Ormoc and the entire length of the Japanese-held Ormoc Road are under the harassing fire of American Long Toms. Few mines, anti-tank or anti-personnel, have been encountered. In eight days of action on the Ormoc Road the Americans lost only one tank That happened when a Japanese jumped out of a ditch and placed a magnetic mine on the tracks of a tank which was blasting enemy machine-gun positions on the reverse slope of Breakneck.

Here you can drive up to the front-line n broad daylight without drawing a storm of artillery or getting blown sky high by Teller mines. And that is precisely why more correspondents have been killed here than in any comparable period in the ETO.

The newcomer gets a false sense of security. Hearing none of the usual din of battle, he comes jeeping along, admiring the scenery, when—ping—a sniper's bullet shatters his daydreams.

You have only to make one excursion to the front to realize that this is a different kind of war, and that Japanese bullets and "knee mortars" can kill just as surely as Col. Gen. Von Mackensen's railway guns at Anzio. The knee mortar has been the most effective weapon of the Japanese in the Ormoc drive. It is a 40-mm. job used for close-in work at 40 to 400 yards.

It's Silly to Generalize

Of course, it is silly to generalize on the fighting quality of the Japanese as compared with the Germans. Both are masters of camouflage and infiltration. Perhaps one generalization is permissible.

The German is perceptibly more civilized, and rarely tries suicide tactics: When a mission becomes hopeless the German gives up. The Japanese never does. It is the First Division's custom to send nightly patrols through the American lines. These attempt to reach artillery and other installations far to the rear. Even at this correspondent's billet, five miles from the Japanese lines, all ranks carry carbines outside the inclosure, even when venturing only as far as the latrine.

The Japanese basic infantry weapon is a light automatic rifle. It is inferior to our own Garand, but the Imperials have enough of them, plus 30-cal, machineguns, to put up a respectable volume of fire. Like the Germans, the Japanese favor reverse slopes, digging spider holes some distance below the crest as protection against direct fire. They seldom use bunkers except in marshy terrain.

Once Over Lightly By Charlie Kiley.

NEW YORK, Nov. 16—Congressman Samuel A. Weiss, of Pennsylvania, is fast becoming known as the "Voice of Sports" in Washington. In fact, the energetic Mr. Weiss is threatening the Army football teams' hold on the sports pages these days. In less than 24 hours The Voice (with apologies to Sinatra) was quoted as being all out for the Army-Navy game in Philadelphia for war bonds—as who isn't—and in support of the 200,000 capacity-Memorial Stadium in Washington. The versatile congressman who officiates national football games also is currently involved in the disputed Giant-Eagle tie of last week which he refereed.

United Press' Oscar Fraley wins the brass handled thunder mug for coming up with the first All-America. His first team includes four Army and three Navy men. The Kaydets are End George Poole, Tackle Dewitt Coulter and Backs Glenn Davis and Doc Blanchard—all first-year men! . . . Miami bettors have their choice between three horse parks, nine greyhound tracks and Jai-Alai Fronton, with parimutuels for all. . . . It is estimated that New Yorkers will have wagered about three billion dollars at Aqueduct, Jamaica and Belmont this year when the season ends today.

The Hornell (N.Y.) Pirates of the Pony League undeniably are in the "bushes." They've signed Pitchers Carl and William Bush and Outfielder Charles Bush. . . . Someone ought to tell the boys of Germantown (Pa.) Academy about the facts of life. The other day they lost their eighth game in ten years to the Stevens School for Girls field hockey team. . . If the far west gets any places on the All-America teams it will be purely by accident—schools out there are that by accident—schools out there are that bad off. The same goes for the southwest. As long as there are Army and Navy trainees, the east and midwest will have the cream of the crop, since that's where they all seem to be going. Trainees, however, don't linger long at one spot, which tends to keep the coaches guess-ing who will be in the lineup from week

Major J. D. Armstrong, who describes himself as an "Old Blue," wants to know what kind of a team unbeaten Yale really has in comparison with Army. With a bow to other "Old Blues," and no punches pulled, here it is, Major. If Army had a 15th team it still could whip Yale by three touchdowns. The Elis beat Coast Guard Academy, 7—3. Army beat the same team, 76—0. Yale beat Dartmouth, 6—0, while Notre Dame beat the Big Green, 64—0. Had enough yet?

Commemorating the CCNY football season of seven straight defeats with no points for and 303 against, Daniel Throckmorton Parker pens this verse: You can rave about the Army until you're damn well balmy

The shock of battle experience is a condesire of British wives to get their husbands home on "baby furloughs" may spread to the U.S. if the war lasts beyond this year, D. Kenneth Rose predicted today, but he doubted the advisability of such a plan from the standpoint of "planted parenthood."

Planned parenthood."

Rose, national director of the Planned Parenthood Federation of America, Inc., said that the petition of 3,000 British wives to the British War Office was an outgrowth of the normal desire for parenthood. The proposed plan of giving men furloughs, however, for the purpose of raising a family was impractical both as a military proposition and as a sound sociological premise, he said.

tributing factor, he said.

"Fertility of married couples is known to be temporarily decreased by reason of a husband's battle experience. This is particularly true of those engaged in combat flying." Rose emphasized, however, that infertility induced by such shock was only temporary.

Rose explained why Planned Parent-hood would not indorse any plan for the armed forces to begin having child-ren en masse. The purpose of his organization, he said, is parenthood if the mother has proper medical care, if the family's economic resources are sufficient for rearing of the child, and if the family is "sound."

All in all, Rose said, the primary task at hand is winning the war. After that he believes speedy demobilization of married men is a sounder idea than grant-

95th Division, New in Battle, Rivals Veterans in Heroism

By Earl Mazo

WITH THE U.S. THIRD ARMY, Nov. 16-The 95th "Victory" Division, announced as a unit of the Third Army advancing in Lorraine, has a record of heroism that rivals many veteran divisions in Europe.

A lieutenant, leading a platoon in one of the division's first attacks, was wounded, paralyzed from the hips down. He asked a couple of his men to hold him up while he led the unit on to its objective. Later, at the aid station, he requested that all the other wounded of the platoon be taken care of before
